

Prototyping

Why Prototype?

Here at NEO we want you to have full confidence in your final design which is why we offer the option to prototype before manufacture. Prototyping gives us the opportunity to fix any potential bugs or problems while giving you the reassurance that your product is being made to your specification.

We can produce any quantity of prototype PCB's within a fast turnaround time if required. We can source all of your components or fit your components if you wish to supply them. We work closely with our customers in highlighting and resolving potential issues before manufacture.
